

DATA MANAGEMENT TO CREATE A SAFE DRIVING FORCE

Our commitment is to provide you with the information needed to improve **driver safety and mitigate risk**. With our software solution there is no reason for any of your employees to operate a vehicle without a lawful license.

Why take the time to go through each motor vehicle record one by one when our management system can do it for you without any mistakes?

Benefits:

- We work in partnership with NYS Motor Vehicles and Government agencies to acquire, process, and report critical driver information daily.
- We can protect your organization from increased insurance premiums, claims and potential lawsuits.
- We guard your organization's human and financial resources.
- We prevent financial and psychological effects on employees, their coworkers and families, and their employers.
- Effectively lower the cost of benefits such as workers' compensation, Social Security, and private health and disability insurance by preventing accidents.
