Niraj Patel possesses a unique combination of expertise in business, technology, operations, and internal/external innovations. He has an exceptional ability to leverage emerging technology and ecosystem to provide a competitive advantage to companies. He is a motivational leader known for clearly defining mission and goals to consistently deliver results that exceed expectations.

Mr. Patel is a pioneer in the design and management of digital enterprises powered by data and AI across enterprise-wide global supply chains, regulatory compliance, enterprise-wide security, responsive infrastructures and effective governance to enable rapid business growth. He has led several large-scale and complex transformations at GMAC Commercial, Selex, and IBM worldwide. His leadership and results come from an innovative approach in transforming strategy into outcomes.

Other Leadership roles include Chief Strategy Officer, CIO, Adjunct Professor, Co-founder, and President. These roles have demonstrated a solid ability to build and manage scalable industry-leading technology companies and departments.
