

# Workday Center of Excellence

## Functional Consulting

Architect, design, build, test, and optimize/enhance your:

- Core HR Configuration, Data Setup, and Business Processes
- Workday Security Setup
- Implement SOX Audit Controls and provide compliance support

## Technical Consulting

- Workday basic and advanced reporting support
- Architect, design, build, test, and optimize your Workday Integrations to/from internal systems and external vendors
- Integrate with your existing middleware platform
- API-enable HR data in a secured transport mechanism
- Implement Single Sign On by implementing an IdP/SP model or integrating with an existing IdP – AD/MIM, Okta etc.,

## Project Management

- Our specialized Workday Project Managers drive your projects from start to execution with Change Management

## AMS Support

- Setup and provide a Support model leveraging ITIL principles ~ Level 1, Level 2 and Level 3 Support Model for your shared services/IT organization specifically for Workday Support
- Post Production Support and Minor Enhancements with a Pay As you Go GoModel
- Support for medium to major project/enhancements

## Workday New Release Support

- Staff augmentation support to review release notes for bi-annual Workday upgrades/releases and manage the project from end to end
- Work with your functional/technical staff to create a repository of test scripts for upgrade/new release testing, establishing a repeatable process
